

## Mn18Cr2 Sandvik Bowl Liner

### Basic Information

- Place of Origin: China
- Brand Name: Ascend
- Certification: CE/ISSO9001
- Model Number: HP100 200 HP300 HP400
- Minimum Order Quantity: 1 set
- Price: USD 1.6-2.6 Per Kg
- Packaging Details: Water and rust proof in wooden box or cotainer
- Delivery Time: 7-10 working days
- Payment Terms: T/T, Western Union
- Supply Ability: 10 set per month

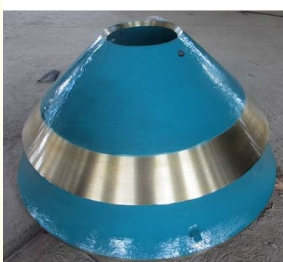

### Product Specification

- Application: Mining, construction, stone And Ore
- Warranty: 1 Year
- After-sales Service Provided: Engineers Available To Service Machinery Overseas
- Condition: New
- Type: Cone Crusher PARTS
- Material: High Manganese Mn18Cr2
- Hot Treatment: Water Quenching
- Spare Parts Supply: Anytime
- Keyword: Stone Cone Crusher Machine, Fine Stone Jaw Crusher
- Highlight: **high manganese sandvik stone crusher, metso sandvik cone crusher parts**

## Product Description

### High Quality Mn18Cr2 Sandvik Cone Crusher Bowl Liner Mantle And Concave Spare Parts

Cone crusher, divided into spring cone crusher and hydraulic cone crusher, is the secondary crusher in mining and quarry industry. It is used to crush medium hard and extremely hard stone, like basalt and granite. The main wear spare parts of cone crusher is mantle and concave, also called bowl liner.

Cone crusher mantle and concave spare parts is usually made of high manganese 13 or high manganese 18, depending on the stone feature. Manganese alloy features "work harden", means the harder the stone, it will hit the mantle and concave surface harder, then the surface of the spare parts will last longer. Manganese content range usually between 13% and 22%, and is usually reference as follows:

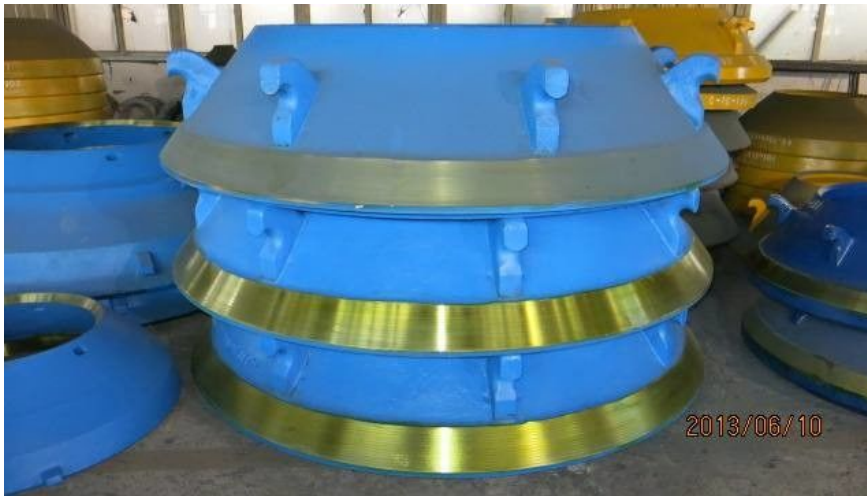

**14% = 13-14% MN**

**18% = 17% - 19% MN**

**21% = 21% - 24% Mn**

Casting with any above percentage depends on the customer working situation. Usually the high percentage manganese will last longer, but it is much subject to the material to be crushed. So before casting, the customer should communicate more technical details with our sales engineer. And usually we can cast according to the drawing or spare parts dimensions offered by the customer.
