

50-350t/H Impact Stone Crusher Machine Primary / Secondary Crushing

Our Product Introduction

Basic Information

- Place of Origin: Zhengzhou, China
- Brand Name: Ascend
- Certification: ISO9001, CE
- Model Number: PF1010 PF1214 PF1315 PF1320
- Minimum Order Quantity: 1 set
- Price: negotiable
- Packaging Details: Large part is non-packed but rustproof and moisture proof then wrapped by plastic sheeting before delivery. The small parts are packed into wooden box.
- Delivery Time: 10-20 working days
- Payment Terms: L/C, T/T, Western Union, MoneyGram
- Supply Ability: 20-50 sets per month

Product Specification

- Keywords: Impact Stone Crusher Machine
- Application: Mine , Cement
- Capacity: 50-350t/h
- Spare Parts: Long-term Supply, Sufficient
- Warranty: One Year
- Input Size: <100mm, <500mm
- Function: Primary Crushing Or Secondary Crushing
- After-sales Service Provided: Commissioning And Training
- Highlight: **Primary Impact Stone Crusher Machine, Secondary Impact Stone Crusher Machine, 350t/H Impact Stone Crusher Machine**

Product Description

50-350t/H Impact Stone Crusher Machine Primary / Secondary Crushing

Impact Stone Crusher Machine is the machine which breaks materials using the impact energy. The rotor rotates of our impact crusher with a high speed driven by power motor when the machine is working. When the materials get into hammer effect area, they are impacting to break with the hammer on the rotor and then threw to the impacting position to take another crushing. After that they spring back to hammer impacting area from impact wrist plate to take crushing again. This procedure repeats itself.

ASCEND

Impact Stone Crusher Machine Features:

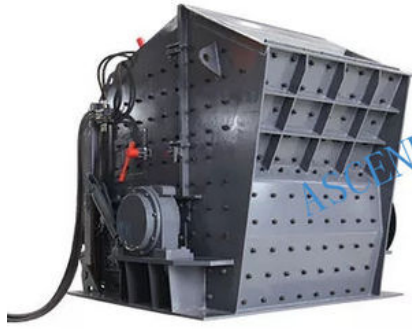

Special structure, keyless connection, high-chromium plate hammer, particular impact liner;
Crushing hard rock, high-efficiency and energy saving;
Cubic shaped, granule of the final products can be adjusted, simplified crushing process.
By technical improvement and research development, the new type of dedusting device can be configured to eliminate the dust and benefit to the environment.

Working Principle

Impact crusher a kind of crushing equipment that using impact energy to crush material driven by motor. When the materials get into the area where the plate hammer effects, by whose high speed impact function, the crushed materials are thrown to the impact device above the rotor continuously, and then they are rebounded from the impact liner to the effect area of the blow bar to be crushed again. The materials are crushed from big-size to small-size in the impact cavity repeatedly. The process goes on until the materials are crushed to the required size and then discharged from the discharging chute.
