Product Description

Product Description

Product Description

New generation combination crusher with small discharging size, this series combination crusher with small discharging size achieve perfect combination between crushing efficiency and operating cost. Meanwhile, it has a wide range of application, particularly is suitable for crushing hard rock, such as basalt, river pebbles. It is also suitable for crushing medium hardness ores, such as iron ore, sandstone, gypsum, blast furnace slag, coal gangue and lump coal.

Working Principle

Working Principle

The material is squeezed, rubbing, grinding and other multiple broken. The angle of Jaw Crusher between toggle plate and swing jaw decreases when swing jaw moves down, the moving jaw of Jaw Crusher moves away from fixed jaw by the pulling of rod and spring, the products after crushing will be discharged from the outlet of Jaw Crusher.
