## Product Description

### High Efficiency Fine Crusher With Horizontal Shaft Barite Quartz Coal 100-250tph Capacity Crushing Plant

## Product Description

Impact crusher adopts quality steels and wear-resistant parts, famous bearing, unique structure, high-accuracy rotor, multifunctional hydraulic operating system, which makes it superior and reliable. Impact crusher is usually used as secondary crusher in the production line, which can help clients win more benefits.

## Advantages of Impact Crusher

The crushing efficiency is higher. Impact liner is of tooth type, which is more efficient, and it has shaping function.

It has strong controllability; the screws or hydraulic start-up devices equipped with the impact crusher makes the maintenance easy.

It is designed with three crushing chambers, seamlessly connected rotor, wear-resistant hammer plate and installation of insert type. The bearing seat is designed with certain gradient, and frame with several openings.

## Spare Parts

The main spare parts of fine sand crusher is rotor and hammer, which are the wear spare parts, need to be changed regularly.

The fine sand crusher hammer is made of high chrome alloy, whose hardness is 62 to 65 HRC, can last longer 2 or three times than common hammer.

## Working Principle

Fine impact Crusher is a kind of impact and rotor crusher with ring hammers. When the material enters into the crusher, it will be crushed by the high speed ring hammer firstly. Crushed materials obtain kinetic energy from ring hammer at the same time, rush to the breaking plate with high speed, by the second break, then fall on the screen plate, materials are crushed further by cutting, pressure, grinding from ring hammer and interaction each other, discharged from screen. The sundries cannot be crushed come into the metal collector, cleaning regularly.
