## Spare Parts

The main spare parts of fine sand crusher is rotor and hammer, which are the wear spare parts, need to changed reguarly. The fine sand crusher hammer is made of high chrome alloy, whose hardness is 62 to 65 HRC, can last longer 2 or three times than common hammer.

## Working Principle

And the rear cavity is provided with a screw rod or a hydraulic opening mechanism. If the parts are damaged, the wearing parts can be easily replaced without opening the main equipment. The wearing parts are made of high hardness, high toughness and multi-alloy wear-resistant material, and the service life is increased by 2-3 times.
